Explanation

The individual issuing department, bureau, office, or agency is considered the publisher of Government publications.

Words and figures enclosed in brackets [ ] are given for information, but do not appear on the title pages of the publications cataloged. Place and printer are not given for publications printed at the United States Government Printing Office, Washington, D.C. Size is not given for octavo publications. Size of maps is approximate, measurement being made from outer edge of border, excluding margin. The dates given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays.

The word "processed" as used in this catalog indicates publications which are reproduced by duplicating processes other than ordinary printing, e.g., mimeograph, multigraph, planograph, rotaprint, multilith. Processed publications are not obtainable from the Superintendent of Documents. Requests for them, if they are available, should be addressed to the issuing office or to the Office of Technical Services, as indicated by the distribution symbol.

Under provisions of the Printing Act of January 12, 1895, all Government publications are entered in the Monthly Catalog. However, administrative and confidential (or restricted) publications are omitted.

The L.C. card number appended to some of the entries is for those libraries ordering printed cards from the Library of Congress. The number at the extreme right of an entry indicates the classification of the publication in the Office of the Superintendent of Documents.

General Information

The Superintendent of Documents, Government Printing Office, Washington, D.C., is authorized by law to sell copies of Government publications and to allow a discount of 25 percent to book dealers and also to quantity purchasers of 100 or more copies of a single publication on condition that they will adhere to the public sales price set by the Superintendent of Documents and that publications shall not be overprinted with any advertising matter.

Publications cannot be supplied free to individuals nor forwarded in advance of payment.

PRICE LIST

There is no general price list of public documents, but numerous lists have been prepared on special subjects and any of these will be furnished free, on application, by subject or subjects concerning which information is desired. It will also be noted that current publications which are for sale are listed in this catalog.

LIST OF SELECTED PUBLICATIONS

In addition to the price lists, the Documents Office issues a biweekly list of Selected United States Government publications for sale by the Superintendent of Documents. Each list is arranged alphabetically by subjects, with annotations and prices, and may be obtained free upon application to the Superintendent of Documents.

CONGRESSIONAL BILLS, DOCUMENTS, AND REPORTS

More than 12,000 different bills are usually introduced during a Congress, and there are additional prints on many during the progress of the legislation. With the exception of a very few—such as revenue bills—the demand is an unknown quantity and on most of them we receive no orders, which makes it impossible to print a sales supply. It may be that a copy could be obtained from your Congressman.

A difficult problem is also presented in providing a supply of congressional documents, hearings, and reports because there are approximately 6,000 of this class of publications issued during a Congress and only a few of them are called for. We will attempt to print for sale a few of the more important ones, but if not priced the only possible source would be from your Congressman.

HOW TO ORDER PUBLICATIONS

Publications entered in this catalog that are for sale by the Superintendent of Documents are indicated by an asterisk (*) preceding the price. Those for sale by the Office of Technical Services, Commerce Department, are indicated by a farad (Φ) preceding the price. A black dot (●) indicates that the publication has been or will be sent to depository libraries. A dagger (†) indicates that application should be made to the department, bureau, or agency issuing the document. A double dagger (‡) indicates that the document is printed for official use and is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary, it will be found under the name of the bureau by which it was published.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing department, bureau, or agency, and the title, together with the classification number which is added to the entry at the extreme right; order the congressional documents and reports by the title, together with the document or report number and the Congress, e.g., H. doc. 108, 82d Congress.

Do not use the L.C. card number in ordering a publication from the Superintendent of Documents.

HOW TO REMIT

Remittances for documents marked with an asterisk (*) should be made to the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C., by coupon, postal money order, express order, or check. Publications cannot be mailed in advance of receipt of remittance. Currency may be sent at sender's risk. Foreign remittances should be made either by international money order or draft on an American bank.

Foreign money, defaced or smooth coins, will not be accepted. Do not send postage stamps.

For the convenience of the general public, coupons in the denomination of 5c that are good until used in exchange for Government publications sold by the Superintendent of Documents, may be purchased from this office. Address order to Superintendent of Documents, Government Printing Office, Washington 25, D.C.

Persons who make frequent purchases from the Superintendent of Documents may find a deposit account convenient. Deposits of $25.00 or more are accepted against which orders may be placed without making individual remittances or first obtaining quotations. Order blanks are furnished for this purpose. After the handling of the order has been completed, it will be returned showing the publications supplied, explanations regarding those not sent, the amount of charge, and the balance on deposit.

No charge is made for postage on documents forwarded to points in United States and possessions, or to Canada, Cuba, Mexico, and certain Central and South American countries. To other countries the regular rate of postage is charged, and remittances must cover such postage. In computing foreign postage, add one-fourth of the price of the publication.

LIBRARY CLASSIFICATION IN DOCUMENTS OFFICE

The classification given at the right of entries for departmental publications is that used in the Library of the Division of Public Documents. It is also used as a catalog number for sales stock of this office. The shilling mark (/) separates what would ordinarily be superior or inferior numbers or letters, as it is not practicable to print these numbers or letters as superiors or inferiors in the Monthly Catalog.

16970 Military specifications. D 1.12:

NOTE.—These specifications are now so completely covered by the Military Index, volumes 2, 3, and 4, published by the Army, the Navy, and the Air Force, semiannually and kept current by cumulative supplements, that listing in the Monthly Catalog of United States Government Publications represents unnecessary and wasteful duplication of effort. For that reason they will no longer be listed.

Complete information on the three indexes of specifications will be found in the May 1960 Monthly Catalog under Entry number 7590 and in the August 1960 Monthly Catalog under Entry numbers 10545, 10561, and 12543.

Niobium, *see* Columbium
Nitric acid:
oxidation rates for selected coals and related substances 17784
systems hydrazine-nitric acid and unsymmetrical dimethylhydrazine-nitric acid, liquid-phase heat-release rates 17914
Nitrogen:
fixation by action of ultrasonic waves, USSR study 17318
organic compounds, infrared spectra in region 15–35 microns 17788
Noctuid moths of scopulepes group of Hemeroplanis Hubner 17962
Noise:
aircraft, considerations for manned reentry vehicles 17905
jet engines, guided missiles and rockets, its effect on man and machine, hearings 16904
transmission of duralumin panel in presence of air flow, measurements 17910
Nomography (mathematics):
application of methods to geodesy 17697
Nonfat dry milk, *see* Milk.
Nonferrous metals, *see* Metals.
Nonmetals, industries, injury experience, 1956–57 17754
North America:
plant pests of importance to agriculture 16459
tidal current tables—
Atlantic Coast 16716
Pacific Coast 16717
veterinary medicine rising expectations (address) 16455
North Atlantic Treaty Organization:
international competitive bidding for infrastructure, program 17129
NATO and Atlantic cooperation, excerpts and bibliographies 16916
United States Citizens Commission on NATO, appoint law 16769
North Carolina, electric rate book 17057

Nottoway County, Va., soil survey 18105
Noxious Printed and Pictured Material Commission, establish, hearings 16886
Nozzles:
annular in proximity to ground, theory 18071
convergent-divergent rocket-type exhaust, conical, performance 17913

Entry

Nozzles—Continued
ejector, cooling shroud for turbojet engine-after-burner installation ---- 17815
exhaust—
annular effect of jet mixing on annular jet ---- 18073
annular hovering performance of vehicles in proximity to ground ---- 18072
jet, design parameters of model ---- 18074
turbine, variable-area, performance in turbojet engine, evaluation ---- 17820
variable area effect on performance of turbojet engine ---- 17822

Nuclear chemistry, *see* Radiochemistry.
Nuclear energy, *see* Atomic energy.
Nuclear explosions, use for deep water excavation in vicinity of Cape Thompson, Alaska, geologic investigations ---- 16566
Nuclear physics, high energy physics, research (remarks) ---- 16578
Nuclear power, *see* Atomic energy.
Nuclear radiation, *see* Radiation.
Nuclear reactions:
controller thermonuclear, research—
hearings ---- 16824–825
summary-analysis ---- 16825
thermonuclear, magnetic emission of high-temperature plasma ---- 16555
Nuclear reactor power plants:
new production, economic feasibility study ---- 16568
PM-1 program, progress report ---- 16561
pressurized water reactor and turbine generator, design study ---- 16571
Nuclear reactors, *see* Reactors (atomic).
Nuclear science series ---- 16563–564
Nuclear weapons, *see* Weapons.
Nucleic acids:
first all-union conference ---- 17481
important problem of biology, USSR study ---- 17235
Nucleoproteins:
important problem of biology, USSR study ---- 17235
S, first all-union conference ---- 17481
Numerical analysis, *see* Numerical calculations.
Numerical calculations:
chemical-equilibrium compositions, analytical investigation of 3 general methods ---- 17916
polygon area from coordinates of its vertexes ---- 17701
Nutrition, calculating value of diets, manual of instructions for punch cards for machine tabulation ---- 16449

O

O.A.S.I. series ---- 17999–18001
Oahu, principal electric facilities, map ---- 17072
